Eslam Mohamed Hassan Flutter Developer / AI & Digital Marketing Specialist

Egypt, Giza eslammoh369@gmail.com +201210204180 github.com/esllamesso

SUMMARY

Flutter Developer and AI & Digital Marketing Specialist working at the intersection of software development, AI, digital marketing, and creative content. Builds scalable, performance-focused mobile apps with Firebase and REST APIs, and uses AI-powered workflows to create marketing videos, designs, and campaign content.

EXPERIENCE

MGH Consultancy — AI & Digital Marketing Specialist / Consultant
- Market and promote educational and professional programs using AI-powered tools and workflows.
- Create marketing videos, promotional content, and visual designs for digital campaigns.
- Develop video concepts, scripts, prompts, and creative assets for social media and online campaigns.
- Support engaging digital campaigns for courses, programs, and educational products.
- Combine AI, content creation, design, and digital marketing to streamline marketing production.

AMIT Learning — Technical & Instructor Flutter, Technical Mentor — DEPI Round 3
- Built and maintained several mobile applications using Flutter, Firebase, Supabase, REST APIs, and local databases, following scalable architecture and industry-standard development practices.
- Provided in-depth technical evaluation and architectural guidance for three real-world software systems, ensuring scalable, maintainable, and high-performance solutions.
- Mentored and supported Flutter students during DEPI Round 3 by reviewing assignments, analyzing code quality, identifying architectural issues, and resolving complex technical challenges in production-level applications.
- Delivered Flutter training sessions as an Instructor, mentoring students and guiding them through the development of real-world applications using Flutter and Firebase.
- Reviewed students' codebases and provided detailed technical feedback to improve code quality, application architecture, maintainability, performance, and adherence to Flutter best practices.
- Assisted students in implementing modern Flutter development practices, including state management, API integration, local storage, Firebase services, responsive UI design, and clean architecture principles.
- Collaborated with learners to debug complex issues, optimize application performance, and enhance user experience across multiple Flutter projects.
- Freelance: built and delivered production-ready mobile applications from client and student requirements.

PROJECTS

DEPI Projects, Flutter

Hospital Complaints Management System (secure multi-role authentication, anonymous reporting, AI chatbot, real-time tracking).
Ministry of Interior Digital Reporting System (anonymous reporting, geolocation, multimedia uploads, voice-to-text, AI-based categorization).
Smart Legal Assistant (AI legal chatbot, document OCR & NLP analysis, legal risk classification).
Focused on **secure authentication**, **role-based access control**, **system design**, **real-time data handling**, and **AI-powered features** (chatbots, speech-to-text, NLP classification).
Debugged, optimized, and fixed issues in **production-ready Flutter applications**, ensuring clean, maintainable, and scalable code.
Implemented UI enhancements and small feature improvements following modern **UI/UX best practices**.
Collaborated with cross-functional teams to improve **application performance, stability, and user experience**.
Gained hands-on experience with **Firebase services**, **REST APIs**, and **Flutter state management** solutions.

Sohba, Flutter
A food ordering platform connecting users with home-based food providers, featuring authentication, restaurant management, menu browsing, order tracking, and scalable backend integration using Firebase and Supabase.

E-Mazon, Flutter E-Commerce App
Developed a high-quality Amazon-style e-commerce app using Flutter, featuring clean UI, fast performance, and scalable code structure.

Doctor Appointment, Flutter
A Flutter-based app connected to RESTful APIs, allowing users to search doctors, book appointments, choose payment methods, and view detailed summaries.

Notaty, Flutter
A modern note-taking application using Flutter and SQLite, featuring note creation, editing, deletion, local storage, intuitive user experience, and optimized performance across Android devices.

TMDB Movies App, Flutter
A movie app similar to Netflix, featuring movie listings, search functionality, and detailed pages using REST APIs.

News App, Flutter
A Flutter application for browsing the latest news from multiple categories, using REST APIs and clean UI design.

Harry Potter Books App, Flutter
Built a themed Flutter app for Harry Potter books with clean UI, smooth navigation, and engaging user experience.

E-Commerce Coffee App, Flutter
Developed an e-commerce app for ordering and delivering coffee.
Included real-time product updates, cart and checkout functionality, and user-friendly UI.

Figma Books App Design, UI/UX
Created a professional Figma UI design for a book borrowing app with a modern layout, smooth user flow, and strong usability focus.

Library Borrowing App, Java
Developed an educational mobile application to manage book borrowing at the institute. Implemented user authentication, dynamic book display, and return reminders using Firebase Firestore and Storage.

On GitHub, More Projects.

ACHIEVEMENTS

Graduation Project: 3rd Place Winner – Ministry-Level Mobile App Competition.

Graduation Project: Best Idea Award – Nationwide Mobile Application Competition.

SKILLS

Technical Skills
- Flutter
- Dart
- Java (Beginner)
- Kotlin (Beginner)
- C#
- HTML
- Android SDK - Flutter SDK
- Custom Widgets & Responsive UI
- Clean Architecture
- MVC Pattern
- State Management: Bloc, Cubit
- Firebase (Auth, Firestore, Storage, Realtime, Messaging)
- RESTful API integration using Dio package
- Localization

UI Tools
- Custom Widgets
- Responsive Design
- Google Fonts
- Lottie - Flutter Animation

Soft Skills
- Time Management & Responsibility
- Communication & Teamwork
- Pressure & Adaptability
- Willingness to Learn
- Attention to Detail
- Thinking & Problem Solving
- Fast learner with strong adaptability

AI & Marketing
AI for Marketing, AI-Powered Content Creation, Digital Marketing, AI Marketing Workflows, Marketing Automation, Social Media Content Creation

AI Tools & Prompting
Claude, Prompt Engineering, Prompt Creation, AI Workflow Design, AI-Assisted Content Production

Creative & Design
UI/UX Design, Video Creation, Video Editing, Graphic Design, Marketing Design, Creative Content Development

Version Control
Git, GitHub

Debugging & DevTools
Flutter DevTools

Technical Tools
- Android Studio
- VS Code
- Windows OS
- Microsoft Word
- Figma
- Canva
- Excel
- Postman
- Google Workspace

Language
Arabic (Native), English (Intermediate)

EDUCATION

Bachelor of Information Systems, Higher Institute of Advanced Studies, Giza, Egypt
Related Coursework: Java Programming, Object-Oriented Programming (OOP), Database Systems, Data Structures & Algorithms, System Analysis.
Expected Graduation: 2023.
